

**Fabien Curto Millet**

Fabien Curto Millet is Google's chief economist. He joined the company in 2011 and is based in San Francisco. The team he leads develops economic insights to guide business decisions across Google, decodes the macroeconomic environment, engages with regulators and policymakers, and pushes the frontier of thought leadership on issues at the intersection of technology and economics. An area of recent focus has been the economic impact of artificial intelligence developments and their multifaceted consequences for the future of work and societies globally.

Before joining Google, Curto Millet was a senior consultant in the European competition policy practice of NERA Economic Consulting, where he worked on cases in a variety of sectors including airports, consumer electronics, financial information, music publishing, pay TV, retail, and satellite communications. He was educated at Oxford University, obtaining his doctorate in economics in 2006, and was a lecturer in economics at Balliol College, Oxford. He further obtained a postgraduate diploma in EC competition law from King's College, London.
