

# Tracy B. McKibben

Founder and Chief Executive Office of MAC Energy Advisors LLC  
Board of Directors: Ecolab Inc (ECL); Huntington Ingalls Industries, Inc. (HII); USAA; and the New York Power Authority (Appointed by Governor Andrew M. Cuomo); National Kidney Foundation

Tracy B. McKibben is an international energy and clean technology expert with 20+ years of experience in the energy sector, including 15+ years focusing on the areas of alternative and renewable energy, clean technology, water, infrastructure, and sustainability management. McKibben is the founder and chief executive officer of MAC Energy Advisors LLC, an investment and consulting company that provides integrated energy solutions to help clients with investments and strategic opportunities across a global platform. McKibben advises multinational corporations and financial institutions on strategic investments and capital investment structuring in the alternative energy, renewable energy, clean technology, water, and energy efficiency sectors. McKibben has also acquired, developed, and financed 200+ MW of global renewable energy assets. McKibben has extensive transactional experience ranging from mergers and acquisitions, business development, valuation and deal structuring, financial strategy, sustainability metrics, and public policy analysis.

McKibben started her finance career in 2007 at Citigroup Global Markets as managing director and head of environmental banking strategy, advising alternative and renewable energy companies and diversified multinational corporations on strategic investments, U.S. and international energy policies, and environmental financing alternatives. She was a member of Citigroup's Alternative Energy Task Force and the Carbon Task Force.

McKibben's public sector experience includes working in several senior level positions including at the White House at the National Security Council as senior director of European affairs and director of European economic affairs and EU relations. McKibben also worked at the U.S. Department of Commerce where her positions included special counsel for international trade and investments, as well as director and executive secretariat in the Office of the Secretary of Commerce. Prior to her work in the public sector, McKibben practiced law at Akin, Gump, Strauss, Hauer & Feld LLP representing and advising clients on commercial and complex litigation matters, as well as corporate and multinational energy clients on strategic investments globally.

McKibben has served on a number of public and private/nonprofit boards. She is currently a member of the board of directors of Ecolab Inc. (ECL), Huntington Ingalls Industries, Inc. (HII), USAA, the New York Power Authority (by appointment of Governor Andrew M. Cuomo), and the National Kidney Foundation. She previously served on the board of directors of GlassBridge Enterprises Inc. (GLAE). McKibben is a member of Clean Energy Business Network and the Women's Forum of New York. She has spoken at various international conferences on issues such as renewable energy, water/energy nexus, clean technology and innovation, as well as numerous United Nations conferences on sustainability. McKibben received her BA from West Virginia State University and JD from Harvard Law School.
